---

I am copying the case attorney for the Krummrich RCRA matter, Rich Murawski. Yes the plant does contribute to Area 2 groundwater contamination.

Tom,

Thanks for that info – this is very helpful.

Who should I talk to about the Krummrich facility?

The interrogatories that we must answer ask about the PRPs responsible and investigations into groundwater contamination that is captured by the GMCS slurry wall at Site R. I think the Krummrich facility is a large source of that contamination. Are there any others where the information that we have would be contained in public records?

Mike

Hi Mike.

In answer to your questions: With reference to the two (2) RRG/Clayton Chemical SF removal actions by AOC (2002 and 2005), yes there are basic administrative records in support of the orders. They are available to the public by contacting the EPA, Region 5 Superfund Division Waste Records Section (mail code: SRC-7J), Mr. Todd Quesada ('quesada.todd@epa.gov' or 312/886-4465), Records Center Manager. At RRG/Clayton, we also issued a 2008 UAO for performance of a final removal action (development and placement of a cap on a hazardous substances pile) to previously recalcitrant large-volume PRPs. That order had a more substantial Administrative Record in support, and a copy of it would also be available to the public. Again, Mr. Quesada would be the person to contact.

If you need the AOC and UAO administrative numbers, please let me know and I will dig them up. I hope this helps. Thanks. Tom Turner email or 312/886-6613

Tom Turner,

In responding to interrogatories in the Sauget Area 2 UAO cost recovery action, we would like to refer to public records such as the Administrative Record for EPA actions. I am familiar with the Area 1 and Area 2 Administrative Records. Are there Administrative Records for the Clayton Chemical and Krummrich facilities? Are these documents publically available?

Tom Martin,

Are there unique Administrative Records that we should include for the Dead Creek, Site G and other removal actions?

Thanks,  
Mike
